

MUCHU MAHADEV

Software Developer

📍 Bhimavaram | 📞 +91 9392539153 | ✉ mahadevmuchu9977@gmail.com | 🔗 LinkedIn | 🐙 GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate and Software Developer experienced in full-stack and backend development using Node.js, Express.js, React.js, PostgreSQL, MongoDB, and REST APIs. Built backend systems with JWT, RBAC, OAuth, and database-driven applications, with experience in Docker, Git, n8n, and AI-integrated workflows.

EDUCATION

Sagi Rama Krishnam Raju Engineering College(A), Bhimavaram

B.Tech in Computer Science & Design

Expected Apr 2027

CGPA: 8.30/10

Sri Chaitanya Junior College

Intermediate

2021 – 2023

93.6%

EXPERIENCE

SocioClub SuperApp – No Ball Entertainments Pvt Ltd | [Link](#) |

Apr–June 2026

MERN Stack Intern

- Developed scalable full-stack applications using React.js, Node.js, Express.js, and PostgreSQL.
- Designed and implemented RESTful APIs, backend services, and database schemas for application workflows.
- Built AI-powered interactions and gamification features for a children's learning platform.
- Implemented role-based access control (RBAC), authentication, and secure application workflows.

AI/ML Research Intern – AICTE IDEALab, SRKR Engineering College

Dec 2025 – Feb 2026

- Engineered a credit card fraud detection pipeline through 2 iterative stages using scikit-learn and Pandas, refining the Stage 2 classifier based on Stage 1 feedback and evaluation results.
- Presented the final fraud detection project at Technology Centre I-Hub, Chinnamiram to faculty and industry evaluators; received internship certification.

TECHNICAL SKILLS

Languages: Java, Python (Basic), SQL

Backend: Node.js, Express.js, REST APIs, API Development

Databases: PostgreSQL, MongoDB

Security: JWT, OAuth, RBAC, bcrypt, Authentication, Authorization

Tools: Git, GitHub, Docker, n8n, Postman, VS Code

Frontend: React.js, CSS

PROJECTS

SecureSend – Secure Communication Platform | [Link](#) |

Node.js, Express.js, MongoDB

- Engineered a zero-knowledge platform supporting encrypted text, image, voice, and file messaging.
- Designed RESTful APIs for secure message exchange, anonymous email workflows, and controlled access.
- Implemented JWT authentication, secure link generation, message expiration, and rate-limiting mechanisms.
- Built RSA-AES encryption workflows with browser-side encryption and alias-based identity management.
- Developed React.js and Tailwind CSS interfaces integrated with backend REST APIs.

AI Automation Exam Conducting System | [GitHub](#) |

Ollama, n8n, Docker, PostgreSQL

- Engineered an AI-powered exam platform supporting 3 user roles with automated question generation.
- Designed RESTful APIs for exam creation, question generation, answer submission, and evaluation.
- Implemented JWT authentication, RBAC, and secure session management for role-based access control.
- Automated AI workflows using n8n and Ollama for syllabus-based question generation and evaluation.
- Containerized backend services with Docker and managed PostgreSQL with pgvector for data storage.

Temple Management Platform | [Link](#) |

Node.js, Express.js, MongoDB, Twilio

- Developed scalable backend services for managing users, temple operations, and service workflows.
- Designed and implemented RESTful APIs with secure CRUD operations and role-based access control (RBAC).
- Incorporated Twilio OTP authentication for secure user verification and account protection.
- Designed MongoDB data models and environment-based backend configuration for reliable deployment.
- Built backend APIs for event scheduling, booking management, and devotee communication.

CERTIFICATIONS & ACHIEVEMENTS

- Privacy and Security Certification – NPTEL.
- Java (Basics) – HackerRank ([Link](#))
